DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/27/05 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 16-19, and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 appears to be missing a step. It starts with the salt, but then the salt is gone in the product. A base would be needed to get rid of the HX. A standard debenzylating agent, such as a Pd catalyst, will not necessarily neutralize the HX. The examiner notes that there is no working example for this process; the closest is example 2, but that does not employ the salt, but rather the free base.

The declaration has overcome the art rejection.

Specification

Page 28, line 13 cites a yield of 110.1%; such is impossible.

Art Unit: 1624

The abstract is objected to. It states that there is a process, but does not state what the process actually consists of. To keep the abstract short, the definitions of A1 and A2 can be removed.
